

EDUCATION

Johns Hopkins University

Bachelor of Science

Baltimore, MD
December 2026

- Major in Computer Science, Minor in Entrepreneurship and Management
- Recruited Student Athlete (Water Polo)
- Relevant course work: Data Structures, Security and Privacy in Computing, Computer Networks, Information Retrieval and Web Agents, Blockchain and Cryptocurrency, Cryptography, Computer System Fundamentals

SKILLS

- Programming: Python, Java, C++, JavaScript, SQL, Go, Rust
- AI: Claude Code, Cursor, Multi-Agent Systems, RAG, Voice Agents
- Frameworks & Tools: React, Node.js, Express, Git, GitHub, Docker, Kubernetes
- Core CS: Object-Oriented Programming, System Design, Networking Fundamentals, Web Security, Distributed Systems
- Databases & Cloud: MySQL, PostgreSQL, DynamoDB, AWS, Google Cloud
- Development Practices: Agile, Test-Driven Development (TDD), CI/CD, Debugging, API Development

WORK EXPERIENCE

DRAFTKINGS

Software Development Intern (Incoming)

Boston, MA
June 2026 - August 2026

- Will work as a SWE Intern at DraftKings, Summer of 2026

KARICH AND ASSOCIATES

AI Automation Engineer

Huntington Beach, CA
May 2025 - August 2025

- Constructed a full-stack application to automate patent application process for a Patent Law Firm, decreased expected time of completion from >3 weeks to less than a day
- Designed a multi-agent RAG system to write specification and claims section of a patent application from a call transcript
- Created a web scraper agent to handle prior art search for a patent app, searched 4+ known patent sites, returned results sorted by relevancy

THE BARMAN LABORATORY

Project Lead - Computer Vision & UAV Software

Baltimore, MD
September 2024 - Present

- Designed and developed autonomous swarm drone software using Python and Mavlink libraries
- Conducted pre flight unit testing of 20+ hardware components and flight simulations for real and virtual UAV deployments
- Devised custom, high accuracy, precision landing software (<3 cm error) using OpenCV and RaspberryPi cameras
- Obtained the FAA Part 107 UAV Certification to test custom drones and software

PROJECTS

ONLINEDRAFT.COM

Generalized Item Drafting Service

Remote
September 2023 - Present

- Constructed full-stack application leveraging AWS (Lambda, CloudFormation, DynamoDB, S3) and React + Node.js
- Generates ~\$5,000 monthly revenue across a userbase of ~2000
- Leveraged LLMs to develop custom RAG-based support and voice agents, handles 5+ customer tickets a month
- Gained the AWS Cloud Practitioner Certification to increase overall knowledge of AWS systems

BARTLETTRE.COM

Custom Static Content Generator For Real Estate

San Francisco, CA
September 2025 - June 2026

- Created a static content generator for a top Realtor Company in San Francisco
- Built for customization by non-technical users of 10+ pages, as well as addition of new listing pages
- Hosted in AWS S3 buckets, deployed on CloudFront to custom domains, uses lambdas with HTML templates to build static pages

DELINEO DISEASE MODELING

Disease Spread Modeling System Funded By WHO

Baltimore, MD
September 2024 - January 2025

- Cleaned and indexed large quantities of enterprise data related to population clusters of 2 cities
- Coordinated with a team of 4 to design a simulation disease spread within a city
- Documented extensive unit tests and software, participated in weekly group meetings
